

Pokémon Indigo - Fossil Locations

How to Find Fossils

- **Mining Minigame:** The primary method for obtaining fossils. All 15 fossil variants can appear as buried treasure during the underground mining minigame. You can access it outside the entrance to Cinnabar Volcano on the upper left side of Cinnabar Island. You need the Climbing Gear to reach this area.
- **Rock Smash:** Using the move Rock Smash on breakable rocks has a small percentage chance to drop a random fossil. The loot pool includes every fossil from Gen 1 to Gen 6.
- **Mt. Moon:** An NPC gives you a choice between the **Helix Fossil** or **Dome Fossil**.
- **Pewter Museum:** An NPC will gift you the **Old Amber**.

Reviving Fossils

Once you have obtained a fossil, you must bring it to a researcher to restore it into a living Pokémon.

Pewter City Museum & Cinnabar Lab

You can take your standard fossils to the NPC at the Pewter City Museum or the Cinnabar Island Lab.

Fossil Item	Restored Pokémon
Helix Fossil	Omanyte
Dome Fossil	Kabuto
Root Fossil	Lileep
Claw Fossil	Anorith
Skull Fossil	Cranidos
Armor Fossil	Shieldon
Cover Fossil	Tirtouga
Plume Fossil	Archen
Jaw Fossil	Tyrunt
Sail Fossil	Amaura
Old Amber*	Aerodactyl

Note: Despite being given the Old Amber in Pewter City, the Museum researcher **cannot revive it. You must take the Old Amber specifically to the Cinnabar Lab.*

Combining Galar Fossils (Cinnabar Lab Only)

Generation 8 fossils work differently. You cannot revive them individually. You have to take them to the NPC **Scott Urbrayn**, who is located at the Cinnabar Lab. You need a "Top" half and "Bottom" half to create Pokémon.

Top Half	Bottom Half	Restored Pokémon
Fossilized Bird	Fossilized Drake	Dracozolt
Fossilized Bird	Fossilized Dino	Arctozolt
Fossilized Fish	Fossilized Drake	Dracovish
Fossilized Fish	Fossilized Dino	Arctovish
