

Pokémon Indigo - Shiny Hunting and Chaining

Base Shiny Rates

- **Standard Shiny:** 0.1% chance (1 in 1,000 encounters). Denoted by a standard red star icon on the summary screen and battle UI.
- **Super Shiny:** 0.01% chance (1 in 10,000 encounters). Denoted by a purple star icon on the summary screen and battle UI. These Pokémon have dynamically shifted hues based on their species name.

The Chaining Method

You can actively increase your odds of finding a Shiny by chaining encounters. To build a chain, you must successfully **defeat** the exact same species of Pokémon consecutively. As your chain grows, the game forces the shiny odds to improve at specific milestones:

Chain Length (Defeats)	Shiny Odds
1 to 9	1 / 1,000
10 to 19	1 / 800
20 to 29	1 / 600
30 to 39	1 / 400
40+ (Max Cap)	1 / 200

Chain Breakers

Chaining requires strict consistency.

- **Breaking the Chain:** Your chain will reset to zero if you defeat or catch a Pokémon of a different species.
- **Safe Actions:** If you encounter a different species, you can simply **Run Away**. Fleeing does not break your active chain.

Shiny Potions

If you want to skip the grind entirely, you can use a **Shiny Potion**. This item guarantees that the very next Pokémon you encounter will be a standard Shiny.

- **Limitations:** Shiny Potions *cannot* generate a Super Shiny Pokémon.
- **Locations:** You can get them by completing Alpha Dens on Prism Island, or you can purchase them from a vendor at the Battle Tower in exchange for BP (Battle Points). The Battle Tower only unlocks after you complete the Prism Island post-game storyline.

Guaranteed Gift Shinies

Pokémon	Level	Nature	Location	NPC
Shiny Eevee	10	Random	Bill's House (Route 25)	Bill
Shiny Gible	10	Adamant	House (Route IV - Prism Island)	Cynthia
Shiny Larvesta	10	Modest	House (Cape Magenta)	Alder
