

Pokémon Indigo - Mining Minigame

How to Access the Minigame

You can access the mining minigame by speaking to the Hiker located outside the entrance to Cinnabar Volcano, on the upper left side of Cinnabar Island. You'll need the **Climbing Gear** to reach this specific area.

How It Works

If you have played the Sinnoh games, you already know what to do here. You're presented with a grid and two tools to unearth buried treasure before the wall collapses.

- **The Pickaxe:** Reveals a smaller area of the grid but causes less damage to the wall.
- **The Hammer:** Reveals a wider area of the grid but damages the wall twice as fast.

Every strike damages the wall at the top of the screen. The minigame ends when the wall collapses or when you unearth all the hidden items. Every time you mine, the game randomly generates 2 to 4 items hidden in the wall. This game is the best way to farm for heart scales, evolutionary items, fossils, and certain held items.
