

Pokémon Indigo – Frequently Asked Questions

Gameplay Mechanics

Platforms & Emulators

- **Supported Platforms:** The game is exclusively for Windows.
- **Android:** Playable using the Joiplay emulator (download it via the Joiplay guide).
- **Mac:** Playable using Whisky or by creating a Windows virtual machine.
- **Steam Deck:** Playable by adding it as a Non-Steam Game.
- **Disclaimer:** Playing on a PC is highly recommended for the optimal experience. The creator is not responsible for Joiplay emulator issues; that is entirely outside their scope.

Playing on PC

You do not need an emulator for PC. Just download it, open the folder, and run Game.exe.

Updating the Game

- **PC:** You do not have to do anything. Just download the new version of the game.
- **Android:** You must transfer your Game.rxdata files from the old game folder to the new one.

Fixing PC Lag

Ensure your PC drivers are fully up to date, especially your graphics card drivers.

Content Creation (YouTube/Streaming)

Yes, you can stream or record it. You do not need to ask for permission.

Controller Support

Yes, you can use any Xbox or PC-compatible controller. You can change your keybinds by pressing **F1**.

Locating Save Files

Open the game folder and click **Save Files and Photos**. It will take you directly to your save path so you can do whatever you want with it.

Gameplay Mechanics

Evolution Methods

Check the in-game Pokédex. It tells you exactly how every Pokémon evolves and provides other useful information in the Data section.

Infinite Rare Candies

"Talk" to the mug inside the Pokémon Center, then check your inventory.

Pokémon Only Receiving 1 EXP

You have hit the level cap for your current number of Gym Badges.

Shiny Odds

The shiny rate is **0.1%** (1 in 1000).

Day/Night Cycle

There are no visual changes, but game does sync with your PC's internal clock to determine if it is day or night.
