

Pokémon Indigo - How to play on MacOS

1. Open "Terminal" (If you already have Homebrew and Whisky installed, you can skip to step 4).
2. Install Homebrew with the following command: `/bin/bash -c "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)"`
(If you already have it installed, you can skip this step)
3. Install Whisky with the command `brew install --cask whisky`
(If you already have it installed, you can skip this step)
4. Open Whisky.

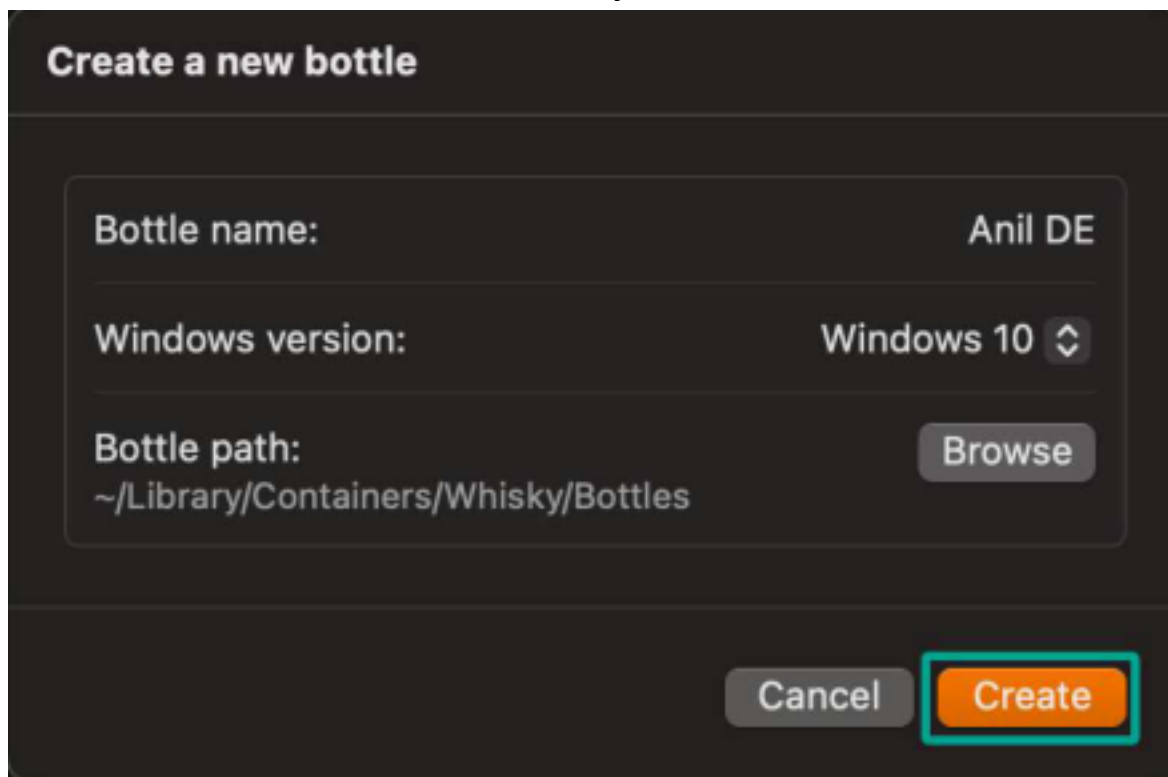

1. Create a Windows 10 or 11 Bottle.

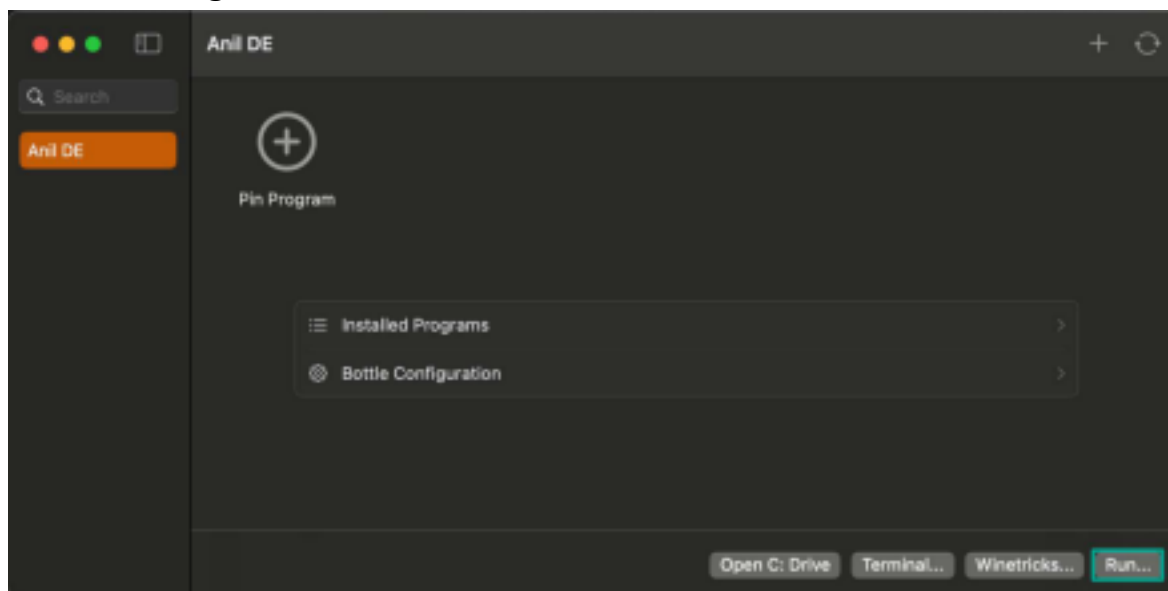

2. Choose a name for the Bottle and click "Create".

3. Once the Bottle has been successfully created, click on the "Run..." button.

4. Select the game's [Game.exe](#).

5. Done, after a few seconds the game should open.
